

ADAPTIVE SILL SYSTEM

Unprecedented Performance.

The ADActive Sill System protects against door unit failure and resulting service calls with a patent-pending design that achieves unprecedented water-rated performance.

An End To Leaks And Repairs.

1 Between The Base Of The Jamb And Edge Of The Sill.

Innovative Jamb Boot: Features pre-drilled screw locations and, once fasteners are installed, supports a more robust corner assembly.

Pre-Applied Sealing Gasket: Behaves as a sealant between the jamb and sill.

2 At The Weatherstrip.

Sealing Beak: Positioned beneath the weatherstrip, blocks upward water pressure and resulting water infiltration.

3 Beneath The Sill.

Full-length caulking strip: Provides a full-length barrier against water infiltration beneath the sill.
